

A Notice to the Members of Saskatoon Engineering Society

If you are interested in attending the *Masters Certificate in Project Management (MCPM)* program at the Edwards School of Business for the Saskatoon fall 2018 session, you are eligible to use \$1000.00 discount for the registration of the course. This program's tuition is normally \$8550.00. However, if you register for the program by August 31, 2018, you will be offered a discounted tuition of \$7550.00. The total Fee includes full program tuition, all teaching materials, IPAD, program resources, lunches, refreshments, framed graduation certificate and recognition event.

The MCPM is an accelerated program delivered by the Edwards School of Business in 18 days over a span of approximately 5-6 months in convenient Friday/Saturday sessions. The overview of the course can be found on the website of the Edwards School of Business (<http://www.edwards-executive.ca/Masters-Certificate-Project-Management-EM>). The brochure, which contains the course syllabus, is also attached to this notice. Attendees at this program are entitled to 126 Professional Development Units (PDUs) from the Project Management Institute, Inc. upon completion.

If you are not sure that this program is what you are looking for, you are invited to attend a free breakfast information session on the MCPM program on Friday, June 22, 2018. The information session will start at 7:30 am at the Edwards Executive Education office located at the K W Nasser Centre (256 – 3rd Avenue South), downtown Saskatoon. A free hot breakfast will be served while Doug Land, MCPM Program Director of Western Canada, will be speaking generally about the program and all of its benefits. Doug will also be able to answer any questions that you may have.

IMPORTANT:

Since the \$1000.00 discount is an exclusive offer for the SES members, **you are required to proceed through the SES for the registration of the program**. If you would like to explore the benefit of your membership at the SES for this program or register for the program, please contact Zahra at zaj281@mail.usask.ca

Masters Certificate in **Project Management**

Add value to your projects

Program Leadership Insights

Project Management skills are a new core competency in organizations at all levels.

Understanding how all the phases of the project lifecycle fit together benefits projects of any size.

Structured techniques for project management add the maximum amount of value during project execution.

Presented in Saskatoon and Regina by

In partnership with

Why consolidate and certify your PM skills?

Organizations now understand that success is built on the success of their projects.

Organizations of all types and sizes today understand that **everything is a project** – from implementing a new business system, to getting the boss to Europe and back over 10 days, to organizing a meeting. That means everyone in every functional area – from executive assistants to vice presidents – **is a potential project manager**. Top organizations foster success by cultivating strong Project Resources and supplying their people with the tools and formal training they need to get the job done right the first time.

Why formal training in project management?

Projects can have a lot of moving parts. Successfully managing them requires more than just using PM software to make Gantt charts. **Without formal training, those who execute projects are essentially winging it, learning on the job through trial and error.** They cannot be sure that what they're doing is right or wrong, or missing something, or that the solution they implement is the best possible course of action. To excel at the job, a Project Manager requires concise, comprehensive formal training in the best practices, current thinking, and tools of the trade.

Project managers are now expected to add value.

The PM field is becoming very competitive. Top PMs know that in order to deliver on time, on spec, and on budget, they **need to know all facets of the field and apply their knowledge nimbly and accurately**. That means being able to communicate with the team, manage stakeholders, procure and plan, ensure quality, minimize risk, and so much more.

Truly competitive companies want Project Managers who can connect the work to the overall strategy, and **add value by bringing a complete skill set to bear**. A well-trained project manager trumps the person who's winging it every time.

Masters Certificate in Project Management

The Masters Certificate in Project Management has been designed from the ground up to build excellent project managers – skillful, strategic leaders who can consistently guide projects to success.

With a proven curriculum based on *A Guide to the Project Management Body of Knowledge (PMBok®)* developed by the Project Management Institute (PMI®), the program can return many times the value of the financial investment for years to come through successfully executed projects.

Participants will benefit from:

- The ability to look at a projects in a whole new light and manage them systematically and strategically.
- A huge kit of powerful new tools, documents and templates which can be used as is or modified to suit.
- Getting prepared to write the PMP® designation exam through mastery of the material and the required contact hours (please refer to PMI.org for complete application requirements).
- Hands on practice applying the material through a simulated project woven throughout the program – our ‘secret sauce’ for accelerated, intensified learning.

“Excellent program, I would recommend it to anyone who has the goal of being a project manager in their organization or in their career path.”

Derek McKay, Peter Ballantyne Group of Companies

“I underestimated the value and importance of a project manager’s knowledge and skill set until now.”

Lisa Bagonluri, University of Saskatchewan

■ Overview of Course Modules

The program runs in convenient two or three day modules every second week, including one weekend day.

MODULE 1:

Program Introduction

Review course objectives, establish a strong foundation for learning, introduction to the PMBoK and PM fundamentals..
